

THE GLEICHEN CALL

VOLUME XXVIII NO. 16

GLEICHEN, ALBERTA, WEDNESDAY JULY 4, 1934

SUBSCRIPTION \$2.00 PER YEAR

FIRST ROUNDUP AND STAMPEDE MOST SUCCESSFUL EVENT

After the rain the day and night before a perfect day greeted Gleichen's first roundup and helped to make the show the wonderful success it was. Something of the country attended and they got an eyeful. Once the stampede got underway it kept going until 7 p.m. with most of the people staying to see the final race, the chuck wagon race.

Great credit should be given Messrs A. and G. O'Brien, K. McPhee and R. Hunter, for the excellent performance provided. For a whole week before they had men repairing the fences, corrals, grading the track, getting a line on horses and steers so that when Wednesday the 27th rolled around they were ready.

The first event on the program took place at noon hour with a parade. It was led by "Ollie" and his goat "Ollie's" makeup was greeted by gales of laughter. The Pioneer Meat Market was the only firm to have a float, which attracted much favorable comment. This was followed by cowboys, cowgirls and chuck wagons. At the grounds the first few riders out of the chute had real mean "critters" and the boys took long horse-stands with great regularity. This was especially so in the wild steer riding. The steers were fat and their shoulders were broad, and the animal meant business, for the boys one after another bit the dust and wondered what it was all about.

In the calf roping contest the calves proved to be fast and a lot of the boys made poor throws and as a result no records were broken.

During the afternoon several horse races were run off and some pretty close finishes were noticed. A number of fast horses were brought here for the occasion and gave a very good exhibition of running ability. From a local standpoint the children's horse race created a lot of interest for three of the leading horses ran together, most of the way around the track and finished in a very close finish.

There were only three entries for the chuck wagon race. The fence at the starting point was taken down and the race started in the infield in the approved fashion. All the outfits wound up they way they began. None being able to over haul the other.

THE WINNERS

Bucking horse riding: first, second and third prize money was split three ways: Fred Galarnieu, Gen. Albert Galarnieu, Gen. and Pat Smyth, Husmar.

Back riding: first, second and third prize money was split three ways: Fred Galarnieu, Gen. Albert Galarnieu, Gen. and Pat Smyth, Husmar.

Steer riding: 1st Bud Robinson, Gleichen; 2nd Albert One Runner and Geo. Roberts, Arrowwood.

Wild horse race: Pat Smyth, Husmar.

Wild cow milking: 1st Pat Swaine, Wayne; 2nd Donald McKeen, Gleichen.

Calf roping: 1st Jack B. Edge, Cluny; 2nd Albert Galarnieu, Gains. One mile free-for-all: 1st Neil Campbell, Okotoks; 2nd Tom Morrison, Airdrie.

Half mile open race: 1st Tom Morrison, Airdrie; 2nd N. Northwood, Staveland.

Relay race: 1st Max Threese, Suna, Gleichen.

Local pony race: 1st Percy McArthur, Gleichen; 2nd Oliver Ferguson, Gleichen.

Indian race: 1st Mark Spring Chief; 2nd Mark Spring Chief, Gleichen.

Chuck wagon race: 1st C. Foisler, Munson; 2nd Yellow Old Woman, Gleichen.

The arena events were judged by O. Desjardine, Gordon Dufee and Harry Allen.

The judges for the races were G. House, T. H. Beach and H. Sammons. The wrestling bouts staged at the hockey arena at 8 p.m. were quite interesting. The first bout between Hee Trudeau and Art McKinnon resulted in a draw, each making a fall. The crowd got quite a kick out of this bout. The main event between Jack Kogut and Alex Lee was won by the former. It was easily seen that

Kogut was the best man in the art of wrestling. The dance in the Community Hall was a big success. A great crowd attending.

NOTES OF THE STAMPEDE

Too many people, somehow or other got into the infield near the corrals. This is a dangerous proceeding. They got in the road of the men who saddle the horses, contestants, judges, and themselves. They have an excellent chance of getting killed or horses broken. Besides they cannot see as well as those outside the fence.

There were a lot of near accidents in the infield. Miller of Buffalo Hills, was kicked in the elbow as he was thrown from a horse, while Dufee was kicked in the ankle by a saddle horse. Fortunately no bones were broken.

The Mendocbrook baseball boys did a great business with their refreshment booth. It kept them hustling quenching the thirst of the crowd especially the cowboys, of whom Geo. O'Brien said: "they are as dry as a row."

During a horse race, coming down the home stretch, riders who were going in third place, pulled his horse to one side and grabbed the lines of the second horse and pulled his horse head so that when he finished under the wire he was second. He was disqualified. The act was so glaring that even the spectators on the cut side of the track saw it.

Added to the excitement of the afternoon a Calgary car took fire. A short circuit caused it. Anouncing the black and car number from the stand, the owner got to his car in short order, unlocked the door and disconnected the battery. Very little damage was done.

One wild steer got through the fence, when he happened to hit the weakest part of it in the whole field. I couldn't look for trouble. He wanted to get away from the ring and the last seen of him, he was heading for the wide open spaces. A horse also managed to get through but the steer was not looking for trouble and was soon caught.

Here's hoping Messrs Hunter, McPhee and O'Brien Bros. see the way to make the roundup an annual affair. They have displayed ability to put a stampede over and with the experienced gain last week they will no doubt know how to put on a bigger and better show next time.

MOST MOTH CURES ARE VALUELESS

This year for the first time a great many people are finding clothes infested with moths and considerable damage has been done by the insects, which made it necessary to destroy the articles by fire.

It is said anti-moth fumigators are effective only in containers and are not reliable in ordinary rooms or closets according to result of tests recently made.

Small cases, cards or bags containing naphthalene will not furnish protection against moths when hung in a room or large closet will not drive out flies, mosquitoes, roaches, bedbugs or ants, and will not purify the air of disinfect or destroy odors, according to the result of a test.

For many years the materials were called moth repellants and it was believed that their odour would keep moths from entering a closet or drive them out if they were already there. Experiments have shown that moth larvae will crawl through a line of paradihydro-benzene, commonly called P.D.B., or of naphthalene, and not be affected. Adult moths will fly over P.D.B. placed across the side of a box and deposit eggs on the flannel in the box or will remain and breed in a small open room or closet where both compounds are present in considerable amounts.

Both materials are very effective against moths when used as a fumigant at the proper dosage in such as trunks, boxes, and small tight chests or wardrobes. They cannot be relied upon in the ordinary rooms or closets that are not tight.

W. R. HOWSON, LIBERAL LEADER DELIVERS ADDRESS AT CLUNY

A number of Gleichen people motored to Cluny Saturday evening to attend the Liberal meeting held in the Herman hall there. The hall was filled to capacity and many could not gain admittance.

Mr. David Nelson acted as chairman. J. J. Bowlen, of Calgary was the first speaker. He spoke on natural resources, grazing and financial troubles of the province. He was followed by Mr. St. Germain, M. L. A. of St. Albert on "Why I crossed the floor of the House" and kept the audience good natured by his unique criticism of the U. F. A. and C. C. F. He also spoke in French for a few minutes.

Mr. Watson of Calgary spoke for a few minutes on organizing of 20th century clubs. He was followed by Henry Ross, M.L.A. of Calgary on class legislation. The meeting was closed by a stirring address by Mr. Howson on the shortcomings of administrations, not criticisms. The meeting ended with "God Save The King."

ROSEBUD RESIDENT WRITES REGARDING PROPOSED HIGHWAY

The following letter regarding the proposed road improvement running north and south between Highway No. 2 and the Drumheller-Alaska Highway to the north has been received by The Call from a resident of the Rosebud district. It speaks for itself and indicates just as The Call stated cut, that there is real feeling between two groups of Grassfield municipality ratepayers. The Call has no desire to do anything but allocate justice to all parties concerned, and most gladly gives space to this interesting letter.

Editor Gleichen Call: Some of the friends here were quite upset about your write-up on the Grassfield road problem. I should like to point out certain inaccuracies in that article. However, it is too big a problem to go into fully in a letter, and the only thing I may point out is that the Rosebud choice for the road is away out at the west side of Grassfield municipally where it would serve but a fraction of the ratepayers, whereas the road as urged by Standard, Redland and Rosebud is almost precisely in the centre.

I may say that Rosebud has the municipal office and has in the past largely dominated municipal affairs. But when it came to a question of this large capital expenditure the rest of the municipality woke up to the need of standing for the rights of the majority.

As a result four of the six councillors are standing firmly on the issue which involves a question of justice to the ratepayers as a whole, irrespective of where they happen to reside.

FLOUR MILL WINS SUIT IN ALLEGED WRONGFUL DEMISESSAL

Claims of J. R. Henderson, Calgary miller, against A. C. Robertson and Company Limited, owners and operators of the Gleichen Flour Mill, for damages for wrongful demise and some khathis are withdrawn cut it was won by Henderson.

Henderson had claimed that he was entitled to \$62.50 for salary from August 15 to September 1, 1933, and \$525 for alleged wrongful dismissal on November 4th.

After hearing a large number of witnesses Mr. Justice said he was of the opinion that when Henderson left the employ of the defendant company and had received payment of \$851.89, the amount paid was in full settlement of all claims the plaintiff had against the company. He therefore dismissed the action with costs.

M. B. Peacock, K. C. and G. M. Peacock, of Peacock, Skene and Peacock, acted for the plaintiff and defendant company was represented by H. G. Nolan of Bennett, Hannan and Sanford.

RESULTS OF EXAMS. GLEICHEN PUBLIC SCHOOLS

Primary room promotions: Grade I to Grade II: Billy McIntyre, Florence Bell and Therese Fleury, Annie Brownay, Leslie Wilson, Marion Smith, George Gooderham, Edward James, Kenneth Matheson, Ronald Gilbert, Alvin Sutherland, Shirley Hartree, Stanley Warne, Eugene Plante, Grace Guttrath, Coleen Warne. Grade II to Grade III: John Boyd, George Varndell, Maureen Pincus, Tom James, Peggy Bogstie, John Bodeminski, Edward Rishaug, Louis Krause, Hazel Crum, Seldon Johnston. MISS A. KENT, Teacher.

Promotions Grade IV: Margery Gorrell and Rachel James, Wallace Smith, Ted Varnell, Dorothy Bogstie, Ruby Dingman, Grace Deshayes, Lee Christianson, Gordon Wilson, Mary Guttrath, Laurence Greer, Not promoted, Edgar Taylor. Grade III Promotions: Agnes Boyd, Joan Petrie, Arthur Nicholas, Evelyn Downey, Betty Jane McQueen, Jean Black, Gwen Clark, Olga Strychar, Dickie Winthorpe, Beverly Hartree, Donald Farguherson, Jean Dafee, Rosie Woods, George Mathison. Not promoted, Donald Reid. MISS JEAN M. COOK, Teacher.

Grade V Honors: Herbie Guttman, Kenneth Boyd, Marie Lumsden. Passed: Mike Konak, Leonard Christianson, Ronald Halstead, Martin McLean, Elton Evans, Eleanor Gooderham, Liss Thorburn, Homer Desjardine, Teddie Egelse, Leroy Menard, Jackie Bell, Harold House (year's work) Recommended on trial: Florence Jeffers, Alice Krause.

Grade VI Monors: Rita Halstead, Eileen Jones, Carol Trego, Bernice Krause, Jackie Robinson, Florence Warner, Bobby Sather. Passed: Marian Gilbert, Campbell Evans, Earl Clark, Orla Jeffers, Helen Kelly, Dennis Woods, Alex Murray, Patty Swain, Margaret Dafee, Irene Young, Euphemia McBean, Elizabeth Gooderham (year's work) Recommended on trial, Vera Mathison. Miss M. VanVollenburg, Teacher.

Grade VIII to Grade IX: Phillis Halstead, James Swain, Gwen Gilbert, Foster Ferguson, Della Hunter, Marion Varndell, Frank Harrison, Grace Aschell, Margaret Guttrath.

MISS L. MORTON, Teacher.

THE WEEK AT OTTAWA

(BY F. W. GERSHAW) Canada has some thirty-six other countries of the world, has now a Central Bank called the Bank of Canada. The head office will be in Ottawa and branches may be established in other places in Canada or outside Canada. The management shall consist of a Governor, Deputy Governor and seven directors. The Prime Minister has stated that the governor will be some one from England and this was the occasion for a rather bitter debate. One side felt that a man experienced in international banking, should be appointed, and the other side argued that some one familiar with the racial and economic conditions of this country, should be appointed and deputy will be full time men.

The stock of the bank will be sold to the public and the rate of interest paid to shareholders will be four and half per cent. If more than this is made as profit, it goes to the treasury. The note issue privileges shall be withdrawn gradually from the chartered banks: 5 per cent for five years, then 10 per cent for five years, in all 75 per cent starting in 1936. A long debate followed the clause on private ownership. The government members voted to a man for private ownership and all the other i.e. Liberal and U. F. A. for government ownership.

The Bank of Canada will take over the seventy million dollars worth of gold from the Finance Department and also all the gold from private banks. The banks will be allowed \$204.67 per ounce for their gold and not \$34.67 which is the present price. The bank will act as a financial agent for the Dominion government and probably the provinces. The Bank

WILL BE IN GLEICHEN EVERY MONDAY

British Speed Ace Beaten

Youth Defeats Malcolm Campbell In Home-Made Car

A young "gutter" in what was virtually a home-made car had beat the thrill of beating Sir Malcolm Campbell—holder of the world's fastest land speed record. It happened at Brooklands in the fourth race.

He was W. E. Harter and he proudly called his car a Harter Special. It was driven by two small M.G. engines coupled up with great skill by this young engineer. Campbell's car was the giant Sunbeam, of 3,978 c.c. The Harter Special was only 1,469 c.c.

Campbell started scratch. Mr. Harter in his homemade car had a start of 31 seconds. Campbell drove with all his accustomed skill. He overhauled the whole field, but found his master in Mr. Harter and his Harter car.

Speedy Rail Service

C.P.R. Provides Faster, More Frequent Service Between Regina and Moose Jaw

The Canadian Pacific has inaugurated a special gas-electric service between Regina and Moose Jaw, making seven trips each way daily except Sunday and four trips on Sundays. In addition, fares have been reduced as follows:—One way \$1.25, return \$1.85 with special week-end fare of \$1.45.

This particularly fast, comfortable service between the two cities should prove very convenient for and popular with the travelling public.

Little Helps For This Week

"Blessed be the Lord who daily loadeth us with benefits." Psalm 134:19.

Source of life's refreshing springs. Whose presence in my heart sustains me. Thy love ordains me pleasant things. Thy mercy orders all that pains me. —A. L. Waring.

When I survey the occurrences of my life and call into account the finger of God, I can perceive nothing but an abyss and mass of mercies, either in general to mankind or in particular to myself. Those things which others term crosses, afflictions, judgments, or misfortunes, to me who inquire further into them than their visible effects they both appear and have ever proved the secret and dissembled favors of His affection. —Sir T. Browne.

Administering The Law

In Central Park, New York, on a forbidden stretch of turf green in the May morning, some children were playing. Suddenly the lawn swooped down on them, hawk-like; two cops in a police car, big with duty, turned their car off the driveway swiftly so it up onto the lawn and right across it to where the children stood. "Get off the grass!" The children ran. The cops backed their car around and scuttled away. Faces settled down again the little prostrate blades of grass struggled slowly back to their feet.

On Taking Chances

Few Motor Car Drivers Would Ride In Horse Race

"They're off!" The cry rang from twenty thousand throats when King's Plate Day saw the opening of the horse racing season at Woodbine Park, Toronto. But the newspaper reports indicate that more than the horse racing season has started. The Highway Death Derby is underway again and the morning newspapers of a recent date carried the story of five deaths. Two days' toll! The prizes for speed and thoughtlessness. It is amazing what a thrill most people get when watching a horse race. The speed is great, there is an element of danger, and there is vibrant eager life. In actual figures, however the fastest speed attained by a horse in a mile race is about 38. odd miles per hour. Nevertheless there are few of those who stand on the lawns and cheer who would care to ride in one of these races. But almost any of them will go out onto the highway and drive—amid conditions of light or traffic, and along side other drivers and vehicles of all types and conditions—at speeds and in a manner which would constitute a hazard were he the only person on the road.

And there is still another difference between horse racing and driving a motor car. The same people who would not dare attempt to ride a horse at a speed of some thirty miles an hour will drive a motor car of sixty, eighty or a hundred horse power at far greater speeds.

A lack of a sense of proportion is also indicated by the behavior of many people who will take a chance and bet on the races—one expects to win sometimes. But on the streets and highways these same people will repeatedly gamble their lives against the saving of a few seconds and never expect to lose. There is an old gambling phrase, "You can beat a race but not the races," which seems to cover the case perfectly. You may have a chance in traffic occupancy and escape harm, but continued unsafe actions will inevitably result in accident, injury or death.

Plastic surgeons claim that more men have their faces lifted than women.

HOW TO KEEP COOL

Take an effervescent glass of pleasant-tasting Aspirin Liver Salt when you begin to feel the heat. As you begin to feel cooler—and you'll feel cooler. Aspirin not only quenches thirst, but cools your blood. Taken occasionally—say twice each week—Aspirin will keep you fit by purifying your system and insuring regular and complete elimination. At all drug stores. In 15c and 50c. New, large bottle, 75c. Sole Agent: John A. Hatasco Co., Ltd., Toronto, 22

Familiarity Dulls Picture

People Neglect To Count Blessings Says Ontario Elder

In conversation the other day with a missionary, home from China on furlough, who is familiar with Western Ontario he remarked:—"What a beautiful part of the world this Western Ontario is at this time of year? And what a wonderful district it is! Where would you get a finer country?" "Yes, it is as you say," we replied. "And yet many people live here all their lives and are not particularly impressed by that fact. It perhaps never occurs to them that we are particularly blessed." The missionary's remark recalled our experience three years ago, on arriving home from a short visit to the dried-out area of Saskatchewan. Coming over by bus from London to St. Peter's that July day in 1931, the countryside was surely a beautiful picture. By contrast with what we had seen three days before on the sand-wet Western plains, it seemed like a veritable paradise. Yet the first person we met after stepping off the bus remarked to us:—"Aren't conditions terrible around here? How are we going to live?" Well, we have lived and nobody starved, and times are beginning to get better. Surely we do not half appreciate our blessings.

Another remark made by our missionary friend was:—"It opened my eyes when I came home after years spent two thousand miles inland in China, to see the facilities in this country for getting around. You go as far as fifteen or twenty minutes on your highways as I can travel in a day's journey in China." Our familiarity with the marvels of science has made them commonplace to us too. That we are little impressed with our modern facilities of every day life as we are with the marvelous way in which we are blessed by nature. We take these things for granted. We neglect to count our blessings.

World's Finest Opal

Worker Found It By Accident In Abandoned Mine

The Harlequin opal, valued at \$8,000 and claimed to be the largest black opal ever found, has reached London.

It measures 2½ by 1½ inches and lies in a bed of velvet in a jeweller's in the west end of London.

It was found by accident in a deserted mine in Australia, by "muckers"—men who comb the mines long after they have been deserted. They knocked down one of the supports and among the broken stones found a large piece of rock in which the opal was enclosed.

Its name was chosen because of its variety, distinctness and almost square coloring. In the centre is a small figure in white, which bears resemblance to a diving woman.

It remains as it was found, uncut, but it has been polished to bring out the brilliance of the colors.

Film Popular With Turks

One Dealing With Care Of Teeth Had Longest Run

Travelling films which deal with health subjects are popular in Turkey.

One dealing with the care of the teeth was shown throughout the provinces for 1,395 days; a malaria film lasted 734 days, and one on the treatment of children for 554 days. But—a picture entitled "Why Willy Won't Wash", received little encouragement from the populace, and had a brief run of only 45 days.

Canada's Fur Production

Canada's production of raw furs in the twelve months ending June 30, 1933, amounted to \$10,395,154, a slight increase over production of the previous year, government statistics reveal. About 30 per cent of the total value is represented by furs taken from animals raised in captivity.

The candle fish of the Pacific is so called, because it is used for a candle; it burns readily if a wick is passed through the body.

Villagers Fear Big Gun

Heavy Artillery To Be Tested Near Shoeburyness, England

Britain's latest monster gun, said to be of 15-inch calibre and destined for the great Singapore naval base, on which work is being hurriedly pushed ahead, will be tested near Shoeburyness, England.

The three greatest pieces of heavy artillery in the world are to be included.

At least one of them is to have its firing trials there, and people over a wide area already suffering from the blowing out of windows and the cracking of ceilings from the reverberation of guns at the Coast Artillery school, are frankly scared by the thought of what the effect of firing the latest giant may be.

An emplacement 30 feet deep, with a diameter of about 100 feet, has been sunk and gun-mountings have been constructed in 24 feet of concrete.

It is said that the gun will be fired without anybody being in the pit with it, the loading by crane, and the firing being automatically controlled.

Military police patrols have now been introduced and the villagers always kept away from the isolated spot where the gun is to be mounted, find their freedom more restricted than ever.

Too Much Sun Harmful

Well-Known Spat Specialist Advises Wearing A Hat

Wear your hat outdoors in the summer time if you want to keep your hair in the warning issued by Paul A. Thomas, well-known spat specialist of Chicago.

"Too much sun makes the hair scraggly, burns and bleaches it and is apt to cause baldness," Thomas said. "Many people who go collegiate soon discover themselves getting shiny on top."

"It is true that the ultra violet rays in sunshine help the hair, but summer sun also contains infra red rays, which burn and cook it. Violet ray should be used only as directed by a physician."

Thomas said that George Bernard Shaw and Albert Einstein are famously hirsute because they always wear hats outdoors.

Ensuring Their Safety

It must be humiliating to proud Americans to read that E. L. Cord, millionaire automobile man has taken his wife and four children secretly to Great Britain because of fear of having his children kidnapped if they remain at home. Quite evidently, in the considered opinion of Mr. Cord, in the United Kingdom is a safer country in which to live than is the United States.

A Strange Catch

Atlantic fishermen on the trawler, Harriet, raised a strange catch in their nets—an aeroplane motor. The motor is believed to be the one ripped from an army plane by the impact of a crash on Feb. 23, 1934, five miles off Rockaway beach. Lieut. George McDermott lost his life in the accident.

Every year, 9,900 earthquakes shake the earth; the internal pressure is adjusted about once every hour.

Will Not Be Exhibited

Inventor Consents To Suppression Of Death Ray Machine

An outstanding invention of the century, a death ray machine, will not be exhibited at the National Congress at Omaha, Nebraska, President A. G. Burns, Oakland, Cal., told delegates.

The invention has been suppressed by the United States government, with the consent of the inventor, Burns said. He said the machine, capable of killing birds in flight two blocks away, was perfected by Dr. Antonio Longoria, a Cleveland, Ohio, physician and electrical engineer.

"I witnessed a demonstration of the machine, by invitation in Cleveland last October," Burns said. "It resembles a motion-picture projection machine in appearance. Several government scientists were there."

"Dr. Longoria turned the ray on rabbits, dogs and cats. They fell over, instantly killed, their blood turned to water. The same thing happened to pigeons, unincised and allowed to fly quite a distance. They fluttered to the ground and were dead when picked up."

Because of its terrible death-dealing possibilities, Dr. Longoria, according to Burns, readily agreed with government representatives that the machine be suppressed.

Sun Spots And Weather

More Rain And Fewer Grasshoppers Is Indication

Cheering words for agriculturists of Western Canada were issued by A. W. Meggett, past president of the Winnipeg Astronomical Society, who predicted more rain and fewer grasshoppers are indicated for Manitoba and the west between now and 1935.

The reason for his assertion is that sun spots on the sun are approaching their maximum period. Since 1928, Mr. Meggett explained, the last time at which sun spots were at their maximum, the sun has been fairly quiet. There has been a falling off in rain, and insects, including grasshoppers, have been multiplying.

"Records kept in Manitoba since 1895," he said, "show that where there has been a maximum sunspot period, there has also been a minimum grasshopper period."

"As the number and size of the sun spots increase, the amount of ultra-violet rays also increases, playing havoc with the insect world, and bringing increased food because the destruction of the upper atmosphere helps to form cloud particles with more abundant water vapor."

THE RHYMING OPTIMIST

By Aline Michaelis

LOVE'S CROWN

Nothing of this did you speak, O, my love. When you came my way; Only your voice was the voice of a dove. And your words were gay. Laughter was light upon your lips, and the sun was the sun. Showed the sky all blue; Garlands you wove me for life's dew. When I went with you!

Nothing of this, O, my love, did you tell. And I tremble now. Strangely the winds to a tempest swell. And the creaking bough Splinters and falls in the gusts of evil.

That are swooping down; Yet, how is it your garlands frail Have become a crown?

The United Kingdom remains Canada's most important market for canned foods, taking over 92 per cent of Canada's total exports of canned fruit in the last fiscal year, and over 41 per cent of the canned vegetables.

There is frequently more power in a woman's tears than in a man's argument.

The most valuable pearls are produced in tropical waters.

A New-Found Continent

Discovered On Pacific Floor By Echoes From Depth Finder

Mountains higher than Mount Everest, huge plateaus twice the width of America and great depths that drop more than six miles downwards—these are characteristics of a new-found "continent." This hitherto unknown territory stretches beneath the surface of the North Pacific. It was discovered by echoes from the depth finder in the U.S.S. Ramapo. The Ramapo has been on a survey of the Pacific ocean bottom. It found that the submerged territory is not marked by steep depths in its separation from North America. In fact, appears to be a raised eastern shoulder of the submerged continent, but the west coast of Asia shows a series of tremendous depths. From north to south in the west portion of the "continent" is a mammoth mountain ridge with towering peaks which are known to Pacific mariners as islands, banks and reefs.

Deer Causes Grief

Jumps Over Railway Gas Car And Injures Two Men

The antics of a frightened deer sent two men to hospital at Sioux Outlook, Ont. The deer jumped over a speeding gas car on the Canadian National Railway and swept Pete Pohoric and Steve Illichuk off the platform.

The men were found in a dazed condition near the tracks, Illichuk with a broken leg and Pohoric badly shaken up.

Mass Suggestion

Australian School Children Ate Candy And Thought They Were Poisoned

Fifteen Newcastle school children, declaring themselves poisoned by candy, were rushed, writhing in agony, to a hospital in ambulances, says a despatch from Sydney, Australia.

Physicians examined the candies and pronounced them perfectly harmless. "An amazing example of mass suggestion," said a physician.

A farmer from the 10th century would have had no great difficulty in familiarizing himself with the tools and implements in farm use 100 years ago, so little progress had been made in farm equipment in 900 years.

There are 6,000 deaths annually in the United States from whooping cough.

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuralgia, sciatica, . . . the fastest relief relief is said, get discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantaneously as you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer is in the form of a cross on an every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note what happens. FOR IT touches bottom. It has started to disintegrate. What is doing this? It is the acid in your stomach. Hence its fast action.

Does Not Harm the Heart

MADE IN CANADA

NOTICE

Due to a change in the method of Taxation on beer by the Dominion of Canada resulting in slightly reduced cost of production, the Breweries of Alberta wish to announce a reduction in the price of Beer of ten cents per case of two dozen pints, effective July First.

ducts, make loans to the Dominion or the provinces, accept deposits from governments or banks without interest and deal with Central banks of other countries. The Bank will

not deal with individuals in a banking capacity, but supervise the chartered banks.

The gold coverage for the bills in circulation is officially reduced from 40 per cent to 25 per cent. This means

that with the seventy million dollars worth of gold, two hundred and eighty millions in currency can be issued. At present there is only about two hundred and thirty counting the fifty million recently provided for in connection with the public works program.

Very few changes were made in the Bank Act, except those necessary to fit the Bank of Canada Act in.

There are many districts disappointed over the works program. Many military buildings are being constructed in some cities, these are not needed. I spoke on this motion and urged that sewerage disposal works be constructed to protect the health of communities and that water conservation reservoirs be constructed to assist the ranching industry in the dry areas. I felt that in building for a greater Canada the human and the productive element should not be overlooked.

Town & District

Saturday Mrs. Wm. McConnell was using new potatoes from her garden. Mrs. McConnell has established a record that will take some effort to beat.

Peter A. Flock an inmate of Even-Hold Home, died Friday at the age of 82 years. He was born in Germany and came to Canada some 22 years ago, and had resided at the Home for a little over two years. The funeral took place Saturday a forenoon with Adult Sutherland conducting the service.

Mr. and Mrs. J. Ramsay spent Sunday and Monday in Banff.

The annual sundance of the Black-foot Indians is now on in full swing. Sunday quite a few whites paid the encampment a visit, but had to stay on the outside of the circle of tents. The Indians wanted to charge, the whites fifty cents for a close up view claiming that they had to pay that to see the stampede. Most of the whites were financially embarrassed, and contented themselves with a long distance view.

Lightening struck a stack of alfalfa on the farm of J. C. Buckley's. The stack took fire and is now a heap of ashes. It is estimated that about \$100 worth of feed was destroyed.

A general meeting and smoker for the members of the Canadian Legion will be held in the club room, on Thursday, July 5th, at 8:30 p.m. Mr. and Mrs. W. Mooney, Fernie B.C., arrived in town Saturday night and spent a couple of days visiting Mr. and Mrs. J. Menard They also called upon a number of their friends while here.

All the teachers except Mr. Gorrill have left for their holidays. Miss Kent left Monday for Ontario, Miss Morton for Calgary likewise Miss Van Valkenburg.

Cons. W. Graves, R.C.M.P., of Regina, has been visiting his father at the home of G. Allistot, for the past few days. Bill has met quite a few of his old chums and acquaintances here and has enjoyed his visit in the old town.

Mr. and Mrs. J. Egles and son, Teddy, accompanied by Mr. I. Gove motored to Banff and Lake Louise for the holiday.

Julius Little spent the holiday in Calgary.

Mrs. Anglin states that her family have been eating garden peas from her garden for the past week or so.

Quite a few Gleichen people took in the sports at Bassano Monday.

For the past ten days Mr. Peter Kelly has had sweet peas in bloom. This is the earliest sweet peas have been known to bloom here.

During the past week Mrs. J. A. Ramsay has been eating garden peas grown in her garden.

Mayor and Mrs. Yutes have a flower garden, lawn, and trees that they may well be proud of. We know of no other garden in these parts that can equal it. Would suggest that you take a walk and when passing by their residence pause and see for yourself.

ELEVATORS DISTRIBUTE PAMPHLETS CONTROLLING CANADA THISTLE

Canada Thistle flourishes in varying degrees in all parts of western Canada. It is a native of Europe and was one of the earliest weeds introduced into Canada. The North-West Grain Dealers Association has financed a survey conducted by Professors G. McRostie and W. Thibodeau, weed control authorities of the Agricultural College of Manitoba University, to determine the most satisfactory means of controlling this weed. The results of this study have been prepared in pamphlet form and these are now available without charge at all line country elevators along with other pamphlets dealing with control of Couch Grass, Sow Thistle and details as to the loss caused through weeds in Western Canada.

Canada Thistle spreads through seed, running roots, seed grain and manure. It causes damage through crowding out field and forage crops; by taking plant food and moisture from and reducing value of crops; by increasing the difficulty of cultivation and making necessary the purchase of special machinery as well as causing increased cultivation and more frequent summerfallow. The booklet outlines that the means of controlling this weed is through keeping the infested land entirely black for one complete growing season. Means of doing this are outlined for various types of soil as well as control through chemicals and smothering. Much valuable information is contained in these pamphlets and farmers are urged to obtain them from any line elevator agent.

Calgary Exhibition and Stampede, Ltd.

"I wish I'd known"

There's always a new experience ahead something you haven't done before and which calls for a decision.

You become engaged—and immediately you are called upon to decide on the purchase of many, many things you never bought before.

You marry—and furniture, draperies, silverware, china, radios, gas stoves, automobiles, gasoline and oils claim your dollars and call for your choice.

A baby comes—and again you face a new experience in purchasing clothes and powders and blankets; in buying a crib, baby carriage, foods, toys.

Next—what school? For the years pass incredibly fast. Once more, a new decision.

Every room of your house requires choice. Every meal served in your dining-room results from your having decided on what to serve. Every day confronts you with a multitude of possibilities from which you must select those which make life happier and better, and make the dollars go farther.

How on earth are you going to make those decisions? How can you know what you want and what you don't want? How can you buy to such advantage that you'll seldom, if ever, have occasion to use that futile phrase, "I wish I'd bought something else"?

You get your ideas from reading advertisements do you not?

The non-advertisers should think this matter over too.
